

THE CONFERENCE BOARD

FOR RELEASE: 10:00 A.M. ET, Thursday, August 21, 2014

The Conference Board®
U.S. Business Cycle IndicatorsSM
THE CONFERENCE BOARD LEADING ECONOMIC INDEX®
(LEI) FOR THE UNITED STATES
AND RELATED COMPOSITE ECONOMIC INDEXES FOR JULY 2014

The Conference Board Leading Economic Index® (LEI) for the U.S. increased 0.9 percent, **The Conference Board Coincident Economic Index® (CEI)** increased 0.2 percent and **The Conference Board Lagging Economic Index® (LAG)** increased 0.2 percent in July.

- The Conference Board LEI for the U.S. increased for the sixth consecutive month in July. Large positive contributions from the yield spread, building permits, initial claims for unemployment insurance, and the ISM® new orders index fueled this month's gain. In the six-month period ending July 2014, the leading economic index increased 4.0 percent (about an 8.2 percent annual rate), faster than the growth of 2.9 percent (about a 5.9 percent annual rate) during the previous six months. In addition, the strengths among the leading indicators became very widespread in recent months.
- The Conference Board CEI for the U.S., a measure of current economic activity, increased slightly in July. The index rose 1.8 percent (about a 3.6 percent annual rate) in the six months through July 2014, twice as fast as in the previous six months. Also, the strengths among the coincident indicators have remained very widespread with all components advancing over the past six months. The lagging economic index continued to increase almost at the same pace as the CEI, and the coincident-to-lagging ratio remained virtually unchanged. Real GDP expanded at a 4.0 percent annual rate in the second quarter of the year, after contracting 2.1 percent (annual rate) in the first quarter.
- The Conference Board LEI for the U.S. improved again in July, and the pace of growth has been accelerating over the past several months. Meanwhile, the CEI for the U.S. has been rising moderately through July, and its six-month growth rate has continued to advance. Taken together, the consistent improvements in both of the composite indexes, coupled with widespread strengths among their components, suggest that the current expansion in economic activity will continue at a strong pace through the end of this year.

LEADING INDICATORS. Seven of the ten indicators that make up The Conference Board LEI for the U.S. increased in July. The positive contributors – beginning with the largest positive contributor – were the interest rate spread, building permits, average weekly initial claims for unemployment insurance (inverted), the ISM® new orders index, the Leading Credit Index™ (inverted), stock prices, and manufacturers' new orders for consumer goods and materials*. The negative contributors – beginning with the largest negative contributor – were average weekly manufacturing hours, manufacturers' new orders for nondefense capital goods excluding aircraft* and average consumer expectations for business conditions.

The LEI for the U.S. now stands at 103.3 (2004=100). Based on revised data, this index increased 0.6

The next release is scheduled for September 19, 2014, Friday at 10 A.M. ET

percent in both June and May. Over the six-month span through July, the leading economic index increased 4.0 percent, with nine out of ten components advancing (diffusion index, six-month span equals 90 percent).

COINCIDENT INDICATORS. All four indicators that make up The Conference Board CEI for the U.S. increased in July. The positive contributors to the index – beginning with the largest positive contributor – were employees on nonagricultural payrolls, industrial production, personal income less transfer payments*, and manufacturing and trade sales*.

The CEI now stands at 109.6 (2004=100). Based on revised data, this index increased 0.3 percent in June and increased 0.2 percent in May. During the six-month period through July, the coincident economic index increased 1.8 percent, with all four components advancing (diffusion index, six-month span equals 100 percent).

LAGGING INDICATORS. The Conference Board Lagging Economic Index for the U.S. stands at 124.6 (2004=100) in July, with three of its seven components advancing. The positive contributors to the index – beginning with the largest positive contributor – were the average duration of unemployment (inverted), the ratio of consumer installment credit to personal income* and commercial and industrial loans outstanding*. The negative contributors – beginning with the largest negative contributor – were the change in CPI for services and the change in index of labor cost per unit of output, manufacturing*. The ratio of manufacturing and trade inventories to sales* and the average prime rate charged by banks held steady in July. Based on revised data, the lagging economic index increased 0.5 percent in June and increased 0.4 percent in May.

DATA AVAILABILITY AND NOTES.

The data series used to compute **The Conference Board Leading Economic Index**[®] (LEI) for the U.S., **The Conference Board Coincident Economic Index**[®] (CEI) for the U.S. and **The Conference Board Lagging Economic Index**[®] (LAG) for the U.S. and reported in the tables in this release are those available “as of” 8:30 am ET on August 19, 2014. Some series are estimated as noted below.

* Series in The Conference Board LEI for the U.S. based on our estimates are manufacturers’ new orders for consumer goods and materials, and manufacturers’ new orders for nondefense capital goods excl. aircraft. Series in The Conference Board CEI for the U.S. that are based on our estimates are personal income less transfer payments and manufacturing and trade sales. Series in The Conference Board LAG for the U.S. that are based on our estimates are manufacturing and trade inventories to sales ratio, the change in labor cost per unit of output, manufacturing, consumer installment credit to income ratio, and the personal consumption expenditure deflator used to deflate commercial and industrial loans outstanding.

The procedure used to estimate the current month’s personal consumption expenditure deflator (used in the calculation of commercial and industrial loans outstanding) now incorporates the current month’s consumer price index when it is available before the release of The Conference Board LEI for the U.S.

THE CYCLICAL INDICATOR APPROACH. The composite economic indexes are the key elements in an analytic system designed to signal peaks and troughs in the business cycle. The leading, coincident, and lagging economic indexes are essentially composite averages of several individual leading, coincident, or lagging indicators. (See page 3 for details.) They are constructed to summarize and reveal common turning point patterns in economic data in a clearer and more convincing manner than any individual component—primarily because they smooth out some of the volatility of individual components.

Historically, the cyclical turning points in The Conference Board LEI for the U.S. have occurred before those in aggregate economic activity, while the cyclical turning points in The Conference Board CEI for the U.S. have occurred at about the same time as those in aggregate economic activity. The cyclical turning points in The Conference Board LAG for the U.S. generally have occurred after those in aggregate economic activity.

U.S. Composite Economic Indexes: Components and Standardization Factors

<u>Leading Economic Index</u>	<u>Factor</u>
1 Average weekly hours, manufacturing	0.2713
2 Average weekly initial claims for unemployment insurance	0.0336
3 Manufacturers' new orders, consumer goods and materials	0.0830
4 ISM [®] new orders index	0.1606
5 Manufacturers' new orders, nondefense capital goods excl. aircraft	0.0409
6 Building permits, new private housing units	0.0312
7 Stock prices, 500 common stocks	0.0392
8 <i>Leading Credit Index</i> [™]	0.0832
9 Interest rate spread, 10-year Treasury bonds less federal funds	0.1102
10 Avg. consumer expectations for business conditions	0.1468
<u>Coincident Economic Index</u>	
1 Employees on nonagricultural payrolls	0.5159
2 Personal income less transfer payments	0.2222
3 Industrial production	0.1436
4 Manufacturing and trade sales	0.1183
<u>Lagging Economic Index</u>	
1 Average duration of unemployment	0.0371
2 Inventories to sales ratio, manufacturing and trade	0.1244
3 Labor cost per unit of output, manufacturing	0.0500
4 Average prime rate	0.2922
5 Commercial and industrial loans	0.0964
6 Consumer installment credit to personal income ratio	0.1971
7 Consumer price index for services	0.2028

Notes:

The component factors are inversely related to the standard deviation of the month-to-month changes in each component. They are used to equalize the volatility of the contribution from each component and are “normalized” to sum to 1. When one or more components are missing, the other factors are adjusted proportionately to ensure that the total continues to sum to 1.

These factors were revised effective with the release in January 2014, and all historical values for the three composite economic indexes were revised at this time to reflect the changes. (Under normal circumstances, updates to the leading, coincident, and lagging economic indexes only incorporate revisions to data over the past six months.) The factors for The Conference Board LEI for the U.S. were calculated using 1984-2012 as the sample period for measuring volatility. A separate set of factors for the 1959-1983 period is available upon request. The primary sample period for the coincident and lagging economic indexes was 1959-2012. For additional information on the standardization factors and the index methodology see: “Benchmark Revisions in the Composite Indexes,” *Business Cycle Indicators* December 1997 and “Technical Appendix: Calculating the Composite Indexes” *Business Cycle Indicators* December 1996, or the Web site: <http://www.conference-board.org/data/bci.cfm>

The trend adjustment factor for The Conference Board LEI for the U.S is -0.0598 (over the 1984 – present) and 0.0904 (over the 1959-1983 period), and the trend adjustment factor for The Conference Board LAG for the U.S is 0.1551.

To address the problem of lags in available data, those leading, coincident and lagging indicators that are not available at the time of publication are estimated using statistical imputation. An autoregressive model is used to estimate each unavailable component. The resulting indexes are therefore constructed using real and estimated data, and will be revised as the unavailable data during the time of publication become available. Such revisions are part of the monthly data revisions, now a regular part of the U.S. Business Cycle Indicators program. The main advantage of this procedure is to utilize in the leading economic index data such as stock prices, interest rate spread, and manufacturing hours that are available sooner than other data on real aspects of the economy such as manufacturers’ new orders. Empirical research by The Conference Board suggests that there are real gains in adopting this procedure to make all the indicator series as up-to-date as possible.

NOTICES

The Conference Board Leading Economic Index[®] (LEI) for the U.S. news release schedule for 2014:

Friday, September 19, 2014	For August 2014 data
Thursday, October 23, 2014	For September 2014 data
Thursday, November 20, 2014	For October 2014 data
Thursday, December 18, 2014	For November 2014 data

All releases are at 10:00 AM ET.

About The Conference Board

The Conference Board is a global, independent business membership and research association working in the public interest. Our mission is unique: To provide the world's leading organizations with the practical knowledge they need to improve their performance *and* better serve society. The Conference Board is a non-advocacy, not-for-profit entity holding 501 (c) (3) tax-exempt status in the United States.

Leading index											
Percent change	2.9	2.8	2.7	2.7	2.4	2.9	4.0				
Diffusion index	65	60	70	65	60	70	90				
Coincident index											
Percent change	0.9	1.1	1.3	1.3	1.1	1.5	1.8				
Diffusion index	100	100	100	100	100	100	100				
Lagging index											
Percent change	2.3	2.2	2.2	2.2	2.6	2.6	2.0				
Diffusion index	92.9	78.6	92.9	92.9	92.9	92.9	78.6				

p Preliminary. r Revised (noted only for index levels and one-month percent changes). c Corrected.

CALCULATION NOTE: The diffusion indexes measure the proportion of the components that are contributing positively. Components that rise more than 0.05 percent are given a value of 1.0, components that change less than 0.05 percent are given a value of 0.5, and components that fall more than 0.05 percent are given a value of 0.0.

The full history of composite and diffusion indexes is available by subscription on our web site at <https://www.conference-board.org/data/bcicountry.cfm?cid=1>

COPYRIGHT TERMS OF USE. All material in this data table, this press release, and on Our Sites are protected by United States and international copyright laws. You must abide by all copyright notices and restrictions contained in Our Sites. You may not reproduce, distribute (in any form including over any local area or other network or service), display, perform, create derivative works of, sell, license, extract for use in a database, or otherwise use any materials (including computer programs and other code) in this data table, this press release, and on Our Sites (collectively, "Site Material"), except that you may download Site Material in the form of one machine readable copy that you will use only for personal, noncommercial purposes, and only if you do not alter Site Material or remove any trademark, copyright or other notice displayed on the Site Material. If you are a subscriber to any of the services offered on Our Sites, you may be permitted to use Site Material, according to the terms of your subscription agreement.

TRADEMARKS. "THE CONFERENCE BOARD", the TORCH LOGO, "THE CONFERENCE BOARD LEADING ECONOMIC INDEX", "THE CONFERENCE BOARD COINCIDENT ECONOMIC INDEX", "THE CONFERENCE BOARD LAGGING ECONOMIC INDEX", and any other logos, indicia and trademarks featured in this data table, this press release, or on Our Sites are trademarks owned by The Conference Board, Inc. in the United States and other countries ("Our Trademarks"). You may not use Our Trademarks in connection with any product or service that does not belong to us or in any manner that is likely to cause confusion among users about whether The Conference Board is the source, sponsor, or endorser of the product or service, nor in any manner that disparages or discredits us.

Violators of these rights will be prosecuted to the full extent of the law. Nothing herein shall restrict the use of the information by news journalists using the information in a legitimate news publication or periodical.
