

FOR RELEASE: 11:00 A.M. (RIO DE JANEIRO TIME), MAY 19, 2015

The Conference Board®
**THE CONFERENCE BOARD LEADING ECONOMIC INDEX® FOR
BRAZIL, TOGETHER WITH FUNDAÇÃO GETULIO VARGAS
AND RELATED COMPOSITE ECONOMIC INDEXES FOR APRIL 2015**

The Conference Board Leading Economic Index® for Brazil, together with Fundação Getulio Vargas (TCB/FGV Brazil LEI), declined 0.9 percent and *The Conference Board Coincident Economic Index®* for Brazil, together with Fundação Getulio Vargas (TCB/FGV Brazil CEI), was unchanged in April.

- The TCB/FGV Brazil LEI fell again in April following a slight upward revision to the sharp decline in March. Large negative contributions from the terms of trade index, the manufacturing expectations survey, and the exports volume index more than offset positive contributions from the services and consumers expectation surveys as well as stock prices. With April's decline, the six-month change in the leading economic index continued to decelerate, to -6.6 percent (about a -12.8 percent annual rate) between October 2014 and April 2015, a deeper contraction than the decline of 2.3 percent (about a -4.6 percent annual rate) over the previous six months. In addition, the weaknesses among the leading indicators have remained very widespread.
- The TCB/FGV Brazil CEI, a measure of current economic activity, was unchanged in April, based on preliminary data. Between October 2014 and April 2015, the coincident economic index decreased 1.4 percent (about a -2.8 percent annual rate), a deeper decline than the 0.1 percent decrease (about a -0.2 percent annual rate) over the previous six months. Meanwhile, Brazil's real GDP grew by 1.3 percent (annual rate) in the fourth quarter of 2014, an improvement from the 0.6 percent growth (annual rate) in the third quarter.
- The TCB/FGV Brazil LEI has been declining in the last six months through April. As a result, the six-month change in the LEI continued to fall deeper into negative territory, with widespread weaknesses among its components. In the meantime, the pace of the decline in the six-month growth rate of the TCB/FGV Brazil CEI has also accelerated. Taken together, the rapid deterioration in both the LEI and the CEI suggests that Brazil's economy will continue to struggle to grow in the coming months.

LEADING INDICATORS. Five of the eight components that make up the TCB/FGV Brazil LEI increased in April. The positive contributors — in order from the largest positive contributor to the smallest — were the services sector survey: expectations index, stock prices, the consumers survey: expectations index, the swap rate (inverted), and the consumer durable goods production index*. The negative contributors — in order from the largest negative contributor to the smallest — were the terms of trade index, the manufacturing survey's expectations index, and the exports volume index.

<p>The next release is scheduled for Wednesday, June 17, 2015 at 11:00 A.M. (Rio de Janeiro time) <i>In New York – Wednesday, June 17, 2015 at 10:00 A.M. (ET)</i></p>
--

With the decrease of 0.9 percent in April, the TCB/FGV Brazil LEI now stands at 90.3 (2010=100). Based on revised data, this index declined 1.1 percent in March and declined 1.4 percent in February. During the six-month span through April, the TCB/FGV Brazil LEI decreased 6.6 percent, and two of the eight components advanced (diffusion index, six-month span equals 25.0 percent).

COINCIDENT INDICATORS. Three of the six components that make up the TCB/FGV Brazil CEI increased in April. The positive contributors — in order from the largest positive contributor to the smallest — were the volume of sales of the retail market index*, occupied employed population*, and industrial electric energy consumption*. Shipments of corrugated paper declined, while industrial production* and the average real income of workers* were unchanged in April.

Holding steady in April, the TCB/FGV Brazil CEI now stands at 104.0 (2010=100). Based on revised data, this index declined 0.1 percent in March and declined 0.6 percent in February. During the six-month span through April, the TCB/FGV Brazil CEI decreased 1.4 percent, and only one of the six components advanced (diffusion index, six-month span equals 16.7 percent).

FOR TABLES AND CHARTS, SEE BELOW

DATA AVAILABILITY AND NOTES. The data series used to compute the TCB/FGV Brazil LEI and the TCB/FGV Brazil CEI reported in this release are those available “as of” 10:00 A.M. (ET) on May 14, 2015.

* The series in the TCB/FGV Brazil LEI that is based on our estimates is the consumer durable goods production index. The series in the TCB/FGV Brazil CEI that are based on our estimates were industrial production, occupied employed population, volume of sales of the retail market, average real income of workers, and industrial electric energy consumption.

THE CYCLICAL INDICATOR APPROACH. The composite economic indexes are the key elements in an analytic system designed to signal peaks and troughs in the business cycle. The leading and coincident economic indexes are essentially composite averages of several individual leading or coincident indicators. (See page 3 for details.) They are constructed to summarize and reveal common turning point patterns in economic data in a clearer and more convincing manner than any individual component—primarily because they smooth out some of the volatility of individual components.

Historically, the cyclical turning points in TCB/FGV Brazil LEI have occurred before those in aggregate economic activity, while the cyclical turning points in TCB/FGV Brazil CEI have occurred at about the same time as those in aggregate economic activity.

Further explanations of the cyclical indicator approach and the composite economic index methodology appear in The Conference Board's *Business Cycle Indicators* report and website: www.conference-board.org/data/bci.cfm

Brazil Composite Economic Indexes: Components and Standardization Factors

<u>Leading Economic Index</u>	<u>Factor</u>
1. SWAP Rate	0.3267
2. Manufacturing Survey's Expectations Index	0.1202
3. Services Sector Survey: Expectations Index	0.0905
4. Consumers Survey: Expectations Index	0.1185
5. Stock Prices: BOVESPA Index	0.0386
6. Terms of Trade Index	0.1871
7. Consumer Durable Goods Production Index	0.0656
8. Exports Volume Index	0.0528
<u>Coincident Economic Index</u>	
1. Industrial Production	0.1115
2. Industrial Electric Energy Consumption	0.0849
3. Shipment of Corrugated Paper	0.0783
4. Volume of Sales of the Retail Market	0.0828
5. Occupied Employed Population	0.5338
6. Average Real Income of Workers	0.1087

The component factors are inversely related to the standard deviation of the month-to-month changes in each component. They are used to equalize the volatility of the contribution from each component and are normalized to sum to 1.

These factors were revised effective with the release in January 2015. Updates to the leading and coincident indexes normally only incorporate revisions to data over the past six months. The factors above for the leading economic index were calculated using the July 2008 to December 2013 period as the sample period for measuring volatility. Separate sets of factors for the October 2005 to June 2008, February 2002 to September 2005, October 1999 to January 2002, and February 1996 to September 1999 period, are available upon request. The factors above for coincident economic index were calculated using the February 2003 to December 2013 period as the sample period. Separate sets of factors for the April 2002 to January 2003, March 2002, February 2002, February 1996 to January 2002 period, are available upon request. These multiple sample periods are the result of different starting dates for the component data. When one or more components are missing, the other factors are adjusted proportionately to ensure that the total continues to sum to 1. For additional information on the standardization factors and the index methodology, visit our Web site: www.conference-board.org/data/bci.cfm

The trend adjustment factors for the leading economic index are 0.1118 (calculated over the 2004 – 2013 period) and -0.1074 (calculated over the 1996 – 2003 period).

To address the problem of lags in available data, those leading and coincident indicators that are not available at the time of publication are estimated using statistical imputation. An autoregressive model is used to estimate each component. The resulting indexes are constructed using real and estimated data, and will be revised as the data unavailable at the time of publication become available. Such monthly data revisions are now a regular part of the U.S. Business Cycle and Global Indicators program. The main advantage of this procedure is to utilize in the leading economic index the data such as bond yields, stock prices, and change in consumer expectations that are available sooner than other data on real aspects of the economy such as durable goods production. Empirical research by The Conference Board suggests there are real gains in adopting this procedure to make all the indicator series as up-to-date as possible.

NOTICES

TCB/FGV Brazil LEI news release schedule for 2015:

Wednesday, June 17, 2015	For May 2015 data
Wednesday, July 15, 2015	For June 2015 data
Tuesday, August 18, 2015	For July 2015 data
Wednesday, September 16, 2015	For August 2015 data
Friday, October 16, 2015	For September 2015 data
Tuesday, November 17, 2015	For October 2015 data
Tuesday, December 15, 2015	For November 2015 data

All releases are at 11:00 A.M. (Rio de Janeiro time).

ABOUT THE CONFERENCE BOARD

The Conference Board is a global, independent business membership and research association working in the public interest. Our mission is unique: to provide the world's leading organizations with the practical knowledge they need to improve their performance and better serve society. The Conference Board is a non-advocacy, not-for-profit entity holding 501 (c) (3) tax-exempt status in the U.S. For additional information about The Conference Board and how it can meet your needs, visit our website at www.conference-board.org.

ABOUT FGV/IBRE

The Brazilian Institute of Economics (Instituto Brasileiro de Economia—IBRE) at Fundação Getúlio Vargas (FGV) was founded in 1951 to research, analyze, produce and disseminate macroeconomic statistics and applied studies. Its purpose is to inform and help improve public policies and private activities in the Brazilian economy. IBRE is a leading institute in calculating the Brazilian GDP and producing price indices including the General Price Index (IGP) which served as Brazil's official inflation index for many years. In addition to price indices, IBRE prepares trend and business cycle indicators that are widely used by administrators and analysts. www.fgv.br/ibre

AVAILABLE FROM THE CONFERENCE BOARD:

Business Cycle Indicators Internet Subscription *(Includes monthly release, data, charts and commentary)*

\$ 714 (for TCB members)/\$ 908 (for non-TCB members) per year (1 user)

Individual Data Series

\$ 68 per series downloaded

Monthly BCI Report (PDF)

(Sample available at <http://www.conference-board.org/publications/publicationdetail.cfm?publicationid=852>)

\$ 289 (for TCB members)/\$ 357 (for non-TCB members) per year

BCI Handbook (published 2001)

PDF only – website download

Contact Indicators Program at indicators@conference-board.org

Business Cycle Indicators for the U.S., Brazil, the Euro Area, France, Germany, China, India, Japan, Korea, Mexico, Spain, and the U.K., are available at \$ 714 (for TCB members)/\$ 908 (for non-TCB members) per country per year (1 user). Discounts are available to Associates of The Conference Board/FGV and accredited academic institutions.

**The Conference Board Leading Economic Index® and
The Conference Board Coincident Economic Index® for Brazil, together with Fundação Getulio Vargas**

Table 1.--Summary of Brazil Composite Economic Indexes

	2014						2015
	Oct.	Nov.	Dec.	Jan.	Feb.	Mar.	Apr.
Leading index	96.7	95.2	95.1	93.4 r	92.1 r	91.1 r	90.3 p
Percent change	0.1	-1.6	-0.1	-1.8 r	-1.4	-1.1 r	-0.9 p
Diffusion index	37.5	12.5	37.5	31.3	25.0	25.0	62.5
Coincident index	105.5	106.3	104.6	104.7 r	104.1 r	104.0 p	104.0 p
Percent change	0.4	0.8	-1.6	0.1	-0.6 r	-0.1 p	0.0 p
Diffusion index	75.0	66.7	0.0	58.3	8.3	58.3	66.7
	Apr to Oct	May to Nov	Jun to Dec	Jul to Jan	Aug to Feb	Sep to Mar	Oct to Apr
Leading index							
Percent change	-2.3	-2.2	-0.4	-4.6 r	-5.0 r	-5.7 r	-6.6 p
Diffusion index	12.5	25.0	37.5	12.5	0.0	12.5	25.0
Coincident index							
Percent change	-0.1	1.0	-0.2 r	-0.1 r	-1.0 r	-1.0 p	-1.4 p
Diffusion index	33.3	66.7	50.0	25.0	0.0	16.7	16.7

p Preliminary. r Revised (noted only for index levels and one-month percent changes).

CALCULATION NOTE: The diffusion indexes measure the proportion of the components that are rising. Components that rise more than 0.05 percent are given a value of 1.0, components that change less than 0.05 percent are given a value of 0.5, and components that fall more than 0.05 percent are given a value of 0.0.

COPYRIGHT TERMS OF USE. All material in this data table, this press release, and on Our Sites are protected by United States and international copyright laws. You must abide by all copyright notices and restrictions contained in Our Sites. You may not reproduce, distribute (in any form including over any local area or other network or service), display, perform, create derivative works of, sell, license, extract for use in a database, or otherwise use any materials (including computer programs and other code) in this data table, this press release, and on Our Sites (collectively, "Site Material"), except that you may download Site Material in the form of one machine readable copy that you will use only for personal, noncommercial purposes, and only if you do not alter Site Material or remove any trademark, copyright or other notice displayed on the Site Material. If you are a subscriber to any of the services offered on Our Sites, you may be permitted to use Site Material, according to the terms of your subscription agreement.

TRADEMARKS. "THE CONFERENCE BOARD®", the TORCH LOGO, "THE CONFERENCE BOARD LEADING ECONOMIC INDEX®", "THE CONFERENCE BOARD COINCIDENT ECONOMIC INDEX®", "THE CONFERENCE BOARD LAGGING ECONOMIC INDEX®", and any other logos, indicia and trademarks featured in this data table, this press release, or on Our Sites are trademarks owned by The Conference Board, Inc. in the United States and other countries ("Our Trademarks"). You may not use Our Trademarks in connection with any product or service that does not belong to us or in any manner that is likely to cause confusion among users about whether The Conference Board is the source, sponsor, or endorser of the product or service, nor in any manner that disparages or discredits us.

Violators of these rights will be prosecuted to the full extent of the law. Nothing herein shall restrict the use of the information by news journalists using the information in a legitimate news publication or periodical.
