

Anastasia O'Rourke

Managing Director

Yale School of the Environment - Carbon Containment Lab

Anastasia has 20 years experience in the environmental sustainability field, as a consultant, entrepreneur, and researcher in Australia, Sweden, France and the US. Anastasia has specific subject matter expertise in standards and certification systems, cleantech venture investing, and sustainable and green purchasing. Prior to joining the CC Lab, Anastasia was a Senior Technical Consultant with Industrial Economics, where she led a sustainability consulting practice working with federal and state governments, large companies, NGOs, and International organizations on program design, management and evaluation. She co-founded Big Room Inc, developers of the .ECO top level domain and the Ecolabel Index website. She was also a founding Board member of the Sustainable Purchasing Leadership Council (SPLC), a US based 501c3 non-profit.

Anastasia holds a Ph.D. from Yale University with a dissertation focused on cleantech venture investing, a M.Sc. in industrial environmental management and policy from Lund University, Sweden, and a B.A. with first class honors from Sydney University, Australia, for which she was awarded the University Medal.
