

Daniel O'Brien

Vice President of Product
Trase

Daniel O'Brien is Vice President of Product at Trase, where he leads product strategy and the development of agentic AI solutions for healthcare and clinical research.

Daniel is an entrepreneur and technology executive with experience building companies and products across healthcare, AI, and financial technology. Prior to Trase, he worked on healthcare incubations at Red Cell Partners, focused on applying AI and emerging technologies to healthcare. He previously co-founded Floatfi, a healthcare fintech company, where he served as COO and Chief Product Officer, and began his career as part of the early team that built and scaled Rally Health.

Daniel holds an MBA from the Wharton School and a JD from the University of Pennsylvania Law School, as well as a B.A. from Brown University.
