

Markus Strangmüller

Corporate Development, Sustainability and Cities, Sustainability Management
Siemens

Markus Strangmüller is responsible for Sustainability Management at Siemens globally, including governance and operating model for Sustainability, non-financial reporting, ratings and rankings, sustainable business practices as well as Human Rights. He is also responsible for the company-wide Business to Society approach showing the contribution and impact of Siemens to the sustainable development of societies today and in the future. He also coordinates the Siemens Sustainability Board.

Markus joined Siemens almost 30 years ago and has held many different functions in different industries over the years. He spent 2 ½ years in Australia as Project Manager, held P&L responsibility of a Service Business Unit and other strategic and business development roles. He joined Corporate Sustainability department in Office in 2009 and had several functions since within Sustainability since then.

Markus holds a degree in Electrical Engineering (FH Munich) and a Master of Business Administration (MBA) from the European University. He has also taught Strategy at the European University and Globe Business College at EMBA programs. He also holds a certificate as a systemic Coach in Business Context.
