Pre-Conference Seminar – Monday, October 27, 2014

9 AM – 4 PM

Diagnose and Evaluate the Maturity of Your Succession Management Process

This interactive seminar will focus on helping define the roadmap to move your organization’s succession management process forward. While best practices can guide, they do not always adequately inform on what is the right succession management process and roadmap for your business. Leveraging some of the latest thinking and research, this full-day session will enable you to:

- Diagnose the current maturity of your organization’s Succession Management process
- Understand the elements to be considered when identifying the level of maturity that is right for your organization
- Share and jointly discover, with participants from other organizations, the different roadmaps and approaches
- Explore, and potentially discover, the roadmap for your organization

As a participant, you will take away a toolkit that includes the maturity model, a diagnostic tool, and a decision framework for further application in your business. These tools will assist your organization on its journey to effectively ensure you have the right talent, at the right time, and in the right place to support strategic success. This seminar will be very interactive with application activities and group discussion. The session is appropriate for both the novice and the highly experienced leader who is responsible for Succession Management in their organization.

A CEO’s and Board Member’s Commitment to Understanding and Developing Our Future Talent
Linda Parker Hudson recently retired as the CEO and President of BAE Systems, Inc. and serves on a number of company boards. She brings the perspective of an innovative CEO and Board Member who has created many pathways for future talent to prepare for leadership and critical roles. Ms. Hudson will share her view of the importance of a senior leader’s role in succession management in the context of today’s business realities; the process of identifying, selecting, and developing our future talent; and the role of HR in developing and carrying out strategies.
• Creating future talent pools
• Challenging conventional wisdom and advancing women and people of color
• Recognizing and overcoming global organizational challenges
• Driving senior leadership development from the C-Suite

Developing Leaders in Emerging Markets:
Importing Succession Strategies that Accelerate Development
As Western organizations look to emerging markets to drive growth, they should also look at how both global and local organizations in those markets are developing leaders to take on senior roles. CCL has been doing a multi-year study focusing on developing top leaders in emerging economies. Many Western ideas for developing
talent have been exported to these regions, and now it is time to see what succession strategies could be imported from markets such as India, Singapore, and South Africa. This session shares the future challenges that next-generation leaders will face, and the ways organizations in these markets are looking to accelerate the development of leadership talent.

CONCURRENT SESSION D1  1:15–2:30 PM

**Building a Diverse Bench of Successors: The Neuroscience of Breaking Bias**

Organizations everywhere are struggling to authentically move the needle on diversity and inclusion efforts, particularly at the top of the house. Part of the issue is the unconscious biases that drive our decision processes. One challenge with unconscious biases is that educating people about them doesn’t significantly reduce the biases themselves. We are still mostly unconscious about being biased, when we’re being biased. This session presents important next-generation research about how to mitigate biases. Working with a team of top neuroscientists, we found a pattern that turns 150 biases into a dramatically smaller group, based on the neurological quirks beneath our biases. This breakthrough allows us to identify the type of bias in any process and build a mitigation strategy that minimizes the bias right at the source, in our systems and processes.

CONCURRENT SESSION D2  1:15–2:30 PM

**How to Hold a Great Talent Review – Mini-Training Session**

It’s time to rethink succession and talent reviews! Marc Effron will take attendees through a live talent review simulation, highlight the two key responsibilities of HR leaders, discuss how to radically simplify the process, and how to recognize the “typical profiles.” You’ll discuss what’s actually works to predict potential and why some current trends may be leading you astray.

**Informing the Succession Planning Process with Talent Analytics**

PepsiCo has been on a journey over the past few years to integrate analytics into the company’s approach to talent management. Our presenters, Damien DeLuca, who leads the Workforce Planning process for PepsiCo, and Lily Maissen, who is responsible for Predictive Analytics, will describe some of the processes and analyses used by PepsiCo in assessing and building their leadership pipeline. They will also talk about the journey ahead to make talent analytics at PepsiCo more than just a stand-alone function within HR but a normal way of operating. Key topics include:

• Overview of PepsiCo’s Talent Analytics group and their journey
• How analytics can enable succession management for key executive roles,
  Including:
  • Simple data guard rails to keep discussions focused on the right people
  • Metrics to help find a balance between the needs of the person and the needs of the organization
  • Advanced analytics of past talent behaviors to inform the urgency of future moves
  • Assessments to bring greater rigor and objectivity to bench discussions

GENERAL SESSION I  10:15–11:15 AM

Preparing Ready Now Successors
Many organizations seek to have “Ready Now” leaders in the pipeline for succession planning. This session will focus on the individual candidates’ journey as they move from where they are to “ready now”, and address the types of structured processes that are being used to address the journey. Case examples will be included of how some organizations are systematically preparing successor candidates to be “ready” for key strategic roles.
