

THE CONFERENCE BOARD

FOR RELEASE: 10:00 A.M. (BRUSSELS TIME), THURSDAY, AUGUST 26, 2010

The Conference Board[®]
Euro Area Business Cycle IndicatorsSM
THE CONFERENCE BOARD LEADING ECONOMIC INDEX[®]
(LEI) FOR THE EURO AREA
AND RELATED COMPOSITE ECONOMIC INDEXES FOR JULY 2010

BRUSSELS, August 26, 2010... The Conference Board Leading Economic Index[®] (LEI) for the Euro Area increased 1.0 percent and The Conference Board Coincident Economic Index[®] (CEI) remained unchanged in July.

- The Conference Board LEI for the Euro Area increased again in July, as the yield spread, real money supply* and the Economic Sentiment Index made the largest positive contributions. Between January and July 2010, the leading economic index increased 4.5 percent (about a 9.1 percent annual rate), slower than the 5.8 percent increase (about an 11.9 percent annual rate) between July 2009 and January 2010. In addition, the strengths among the leading indicators have become less widespread in recent months, though they are still more widespread than the weaknesses.
- The Conference Board CEI for the Euro Area, a measure of current economic activity, remained unchanged in July, according to preliminary estimates. Between January and July 2010, the coincident economic index increased by 0.5 percent (about a 1.0 percent annual rate), slightly faster than the 0.3 percent increase (about a 0.6 percent annual rate) during the previous six months. In addition, the strengths among the coincident indicators have remained widespread in recent months. At the same time, real GDP grew at a 3.9 percent annual rate during the second quarter, after growing at a 0.8 percent annual rate during the first quarter.
- The Conference Board LEI increased in July and is now above its most recent peak in June 2007. However, the six-month growth rate has slowed from its rapid pace in the second half of 2009. Meanwhile, The Conference Board CEI for the Euro Area was unchanged in June and July, though it has been mostly increasing since October 2009. The recent behavior of the composite indexes suggests that economic activity should continue to grow, though at a more moderate pace in the near term.

LEADING INDICATORS. Six of the eight components in The Conference Board LEI for the Euro Area increased in July. The positive contributors -- in order from the largest positive contributor to the smallest -- are the interest rate spread, real money supply*, the Economic Sentiment Index, the Markit Purchasing Managers' Index (manufacturing), the Markit Business Expectations Index (services), and EURO STOXX[®] Index. New orders of capital goods* and building permits* declined in July.

The next release is scheduled for Monday, September 27, 2010 at 10:00 A.M. (Brussels Time)

In New York – Monday, September 27, 2010 at 4:00 A.M. (ET)

With the 1.0 percent increase in July, The Conference Board LEI for the Euro Area now stands at 112.5 (2004=100). Based on revised data, this index increased 0.6 percent in June and declined 0.4 percent in May. During the six-month span through July, the index increased 4.5 percent, with five of the eight components increasing (diffusion index, six-month span equals 62.5 percent).

COINCIDENT INDICATORS. One of the four components that make up The Conference Board CEI for the Euro Area increased in July. Retail trade* was the only positive contributor this month. Manufacturing turnover* declined in July, while employment* and industrial production* remained unchanged.

After remaining unchanged in July, The Conference Board CEI for the Euro Area now stands at 102.5 (2004=100). Based on revised data, this index remained unchanged in June and increased 0.3 percent in May. During the six-month period through July, the index increased 0.5 percent, with three of the four components increasing (diffusion index, six-month span equals 87.5 percent).

* See notes under data availability.

FOR TABLES AND CHARTS, SEE BELOW

DATA AVAILABILITY The data series used to compute **The Conference Board Leading Economic Index**[®] (LEI) for the Euro Area and **The Conference Board Coincident Economic Index**[®] (CEI) for the Euro Area reported in this release are those available “as of” 10:00 A.M. ET August 24, 2010. Some series are estimated as noted below.

NOTES: Series in The Conference Board LEI for the Euro Area that are based on our estimates are real money supply, residential building permits and new orders of capital goods. Series in The Conference Board CEI for the Euro Area that are based on our estimates are employment, industrial production, retail trade and manufacturing turnover.

THE CYCLICAL INDICATOR APPROACH. The composite economic indexes are the key elements in an analytic system designed to signal peaks and troughs in the business cycle. The leading and coincident economic indexes are essentially composite averages of several individual leading or coincident indicators. (See page 3 for details.) They are constructed to summarize and reveal common turning point patterns in economic data in a clearer and more convincing manner than any individual component—primarily because they smooth out some of the volatility of individual components.

Historically, the cyclical turning points in The Conference Board LEI for the Euro Area have occurred before those in aggregate economic activity, while the cyclical turning points in The Conference Board CEI for the Euro Area have occurred at about the same time as those in aggregate economic activity.

Further explanations of the cyclical indicator approach and the composite economic index methodology appear in The Conference Board's *Business Cycle Indicators* report and website: <http://www.conference-board.org/data/bci.cfm>.

Euro Area Composite Economic Indexes: Components and Standardization Factors

<u>Leading Economic Index</u>	<u>Factor</u>
1. Yield Spread cumulated, 10 year minus policy rate	0.2423
2. Economic Sentiment Index	0.0975
3. Markit Purchasing Managers' Index (Manufacturing)	0.1384
4. Markit Business Expectations Index (Services)	0.0707
5. EURO STOXX® Index	0.0302
6. Money Supply	0.3289
7. New Orders of Capital Goods	0.0413
8. Residential Building Permits	0.0507

<u>Coincident Economic Index</u>	
1. Employment	0.7436
2. Industrial Production	0.0806
3. Retail Trade	0.1370
4. Manufacturing Turnover	0.0388

Notes:

The standardization factors are inversely related to the standard deviation of the month-to-month changes in each component. They are used to equalize the volatility of the contribution from each component and are “normalized” to sum to 1.

These factors were revised effective on the release for January 2010, and all historical values for the two composite indexes were revised at this time to reflect the changes. (Under normal circumstances, updates to the leading and coincident indexes only incorporate revisions to data over the past six months.) The factors above were calculated using 2000-2008 as the sample period for measuring volatility for The Conference Board LEI for the Euro Area. Separate sets of factors for 1987-1993, 1994-1995, 1995-1997, 1997-1998 and 1998-2000 are available upon request. The factors above for The Conference Board CEI for the Euro Area were calculated using 1995-2008 as the sample period. A separate set of factors is available for 1987-1995. These multiple sample periods are the result of different starting dates for the component data. When one or more components are missing, the other factors are adjusted proportionately to ensure that the total continues to sum to 1. For additional information on the standardization factors and the index methodology visit our website: <http://www.conference-board.org/data/bci.cfm>.

The trend adjustment factors for The Conference Board LEI for the Euro Area are -0.3065 calculated over 1987-1996 and -0.3039 calculated over 1997-2008.

To address the problem of lags in available data, those leading and coincident indicators that are not available at the time of publication are estimated using statistical imputation. An autoregressive model is used to estimate each component. The resulting indexes are constructed using real and estimated data, and will be revised as the data unavailable at the time of publication become available. Such revisions are part of the monthly data revisions, now a regular part of the U.S. Business Cycle Indicators program. The main advantage of this procedure is to utilize in the leading economic index the data, such as stock prices, that are available sooner than other data on “real” aspects of the economy, such as new orders and changes in inventory. Empirical research by The Conference Board suggests there are real gains in adopting this procedure to make all the indicator series as up-to-date as possible.

NOTICES

The 2010 schedule for “**The Conference Board Leading Economic Index**® (LEI) for the Euro Area” news release is:

August 2010 Data.....	Monday, September 27, 2010
September 2010 Data.....	Wednesday, October 27, 2010
October 2010 Data.....	Monday, November 29, 2010
November 2010 Data.....	Monday, December 27, 2010

All releases are at 10:00 A.M. (Brussels Time)

ABOUT THE CONFERENCE BOARD

The Conference Board is a global, independent business membership and research association working in the public interest. Our mission is unique: To provide the world’s leading organizations with the practical knowledge they need to improve their performance *and* better serve society. The Conference Board is a non-advocacy, not-for-profit entity holding 501 (c) (3) tax-exempt status in the United States.

AVAILABLE FROM THE CONFERENCE BOARD:

Euro Area Business Cycle Indicators Internet Subscription

(Includes monthly release, data, charts and commentary)

\$565 (for TCB members)/\$715 (for non-TCB members) per year (1 user)

Individual Data Series

\$45 (for TCB members)/\$50 (for non-TCB members) per series downloaded

Monthly BCI Report

(Sample available at <http://www.conference-board.org/data/monthlybci.cfm>)

\$230 (for TCB members)/\$285 (for non-TCB members) per year

BCI Handbook (published 2001)

\$ 25

Corporate Site License

contact Indicators Program at (212) 339-0330

Business Cycle Indicators for China, France, Germany, Japan, Korea, Mexico, Spain, the U.K. and the U.S. are available at \$ 565 (for TCB members)/\$ 715 (for non-TCB members) per country per year (1 user). Discounts are available to accredited academic institutions.

Table 1.--Summary of Euro Area Composite Economic Indexes

	2010						
	Jan.	Feb.	Mar.	Apr.	May.	Jun.	Jul.
Leading index	107.7	108.1 r	109.8 r	111.1 r	110.7 p	111.4 p	112.5 p
Percent change	1.0	0.4 r	1.6 r	1.2 r	-0.4 p	0.6 p	1.0 p
Diffusion index	75.0	31.3	75.0	75.0	25.0	62.5	62.5
Coincident index	102.0	102.0	102.3	102.2 p	102.5 p	102.5 p	102.5 p
Percent change	0.2	0.0	0.3	-0.1 p	0.3 p	0.0 p	0.0 p
Diffusion index	62.5	50.0	87.5	37.5	87.5	50.0	37.5
	Jul to Jan	Aug to Feb	Sep to Mar	Oct to Apr	Nov to May	Dec to Jun	Jan to Jul
Leading index							
Percent change	5.8	4.1 r	4.9 r	5.7 r	4.7 p	4.5 p	4.5 p
Diffusion index	81.3	62.5	87.5	87.5	62.5	75.0	62.5
Coincident index							
Percent change	0.3	0.3	0.7	0.6 p	0.8 p	0.7 p	0.5 p
Diffusion index	62.5	75.0	75.0	62.5	87.5	87.5	87.5

p Preliminary. r Revised (both noted only for index levels and one-month percent changes).

CALCULATION NOTE: The diffusion indexes measure the proportion of the components that are rising. Components that rise more than 0.05 percent are given a value of 1.0, components that change less than 0.05 percent are given a value of 0.5, and components that fall more than 0.05 percent are given a value of 0.0.
