

## News Release

Jonathan Liu (732) 991-1754 / [jonathan.liu@tcb.org](mailto:jonathan.liu@tcb.org)

**For Release 10:00 AM ET, February 13, 2026**

**Using the Composite Indexes:** *The Leading Economic Index (LEI) provides an early indication of significant turning points in the business cycle and where the economy is heading in the near term. The Coincident Economic Index (CEI) provides an indication of the current state of the economy. Additional details are below.*

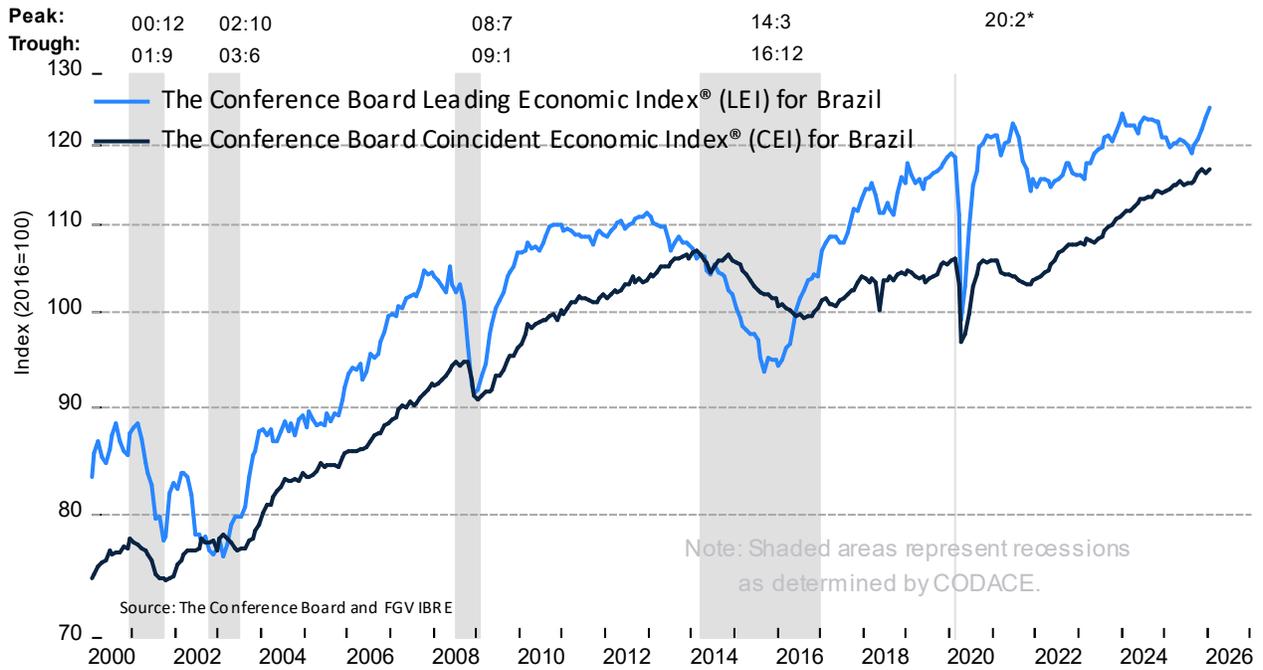

### **The Conference Board Leading Economic Index® for Brazil, together with Fundação Getulio Continued to Rise in January**

**The Conference Board Leading Economic Index® (LEI)** for Brazil, together with Fundação Getulio Vargas, increased by 0.9% in January 2026 to 125.0 (2016=100), after rising by 1.5% in December. As a result of the recent consecutive increases, the LEI expanded by 4.1% over the six-month period between July 2025 and January 2026, substantially more than reversing a contraction of 0.8% from over the previous six-month period between January and July 2025.

**The Conference Board Coincident Economic Index® (CEI)** for Brazil, together with Fundação Getulio Vargas, increased by 0.4% in January 2026 to 117.0 (2016=100), more than offsetting the decrease by 0.3% in December. The CEI expanded by 1.6% over the six-month period between July 2025 and January 2026, twice as fast rate of increase than the 0.8% growth over the previous six-month period.

**The next release is scheduled for Friday, March 13, 2026 at 10 A.M. ET.**

## The Conference Board/Fundação Getulio Vargas Brazil LEI continued to increase in January

\*CODACE has determined that the recession beginning in January 2020 ended in the second quarter of 2020. We will update our business cycle chronology when the monthly trough date is available.

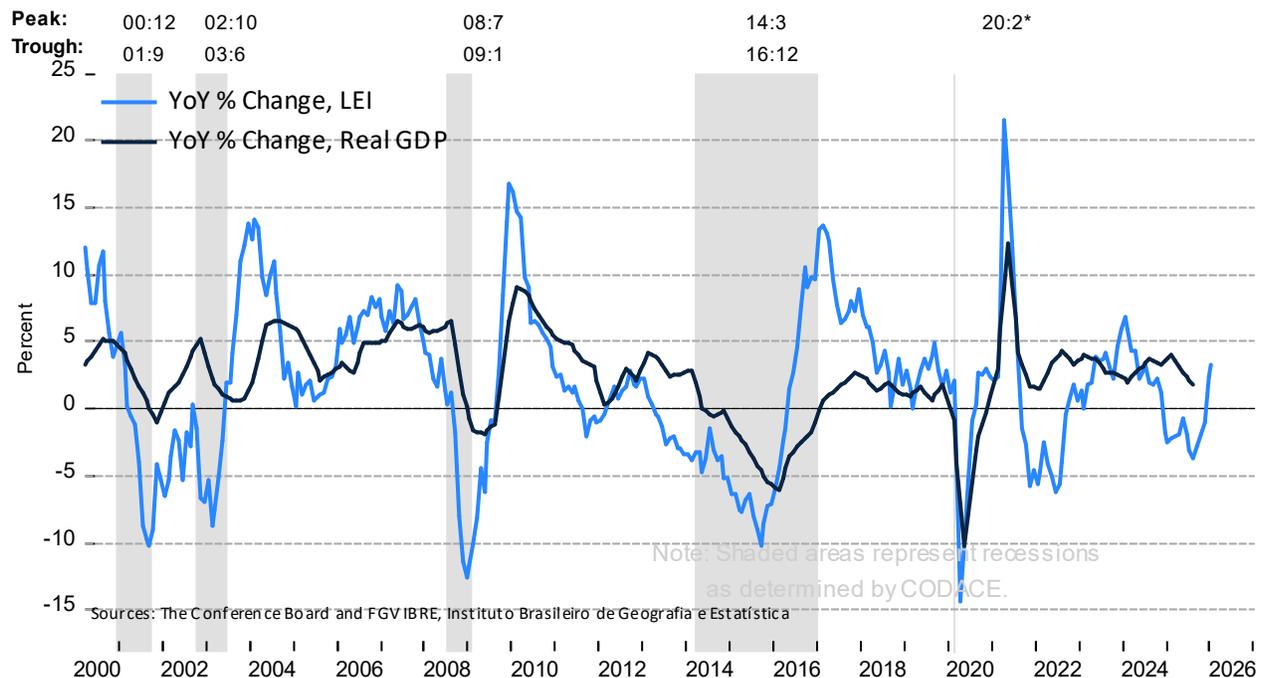

## The January gain in the LEI was largely driven by an increase in stock prices and optimistic business expectations

### The Conference Board Leading Economic Index® and Component Contributions (Percent)

	Jan. '26	6 mo. ending Jan. '26
<b>Financial Components</b>		
SWAP Rate, 1 year*	0.03	0.57
Stock Prices Ibovespa, Bovespa Index	0.54	0.87
<b>Non-Financial Components</b>		
Services Sector Survey, Expectations Index	0.34	-0.08
Manufacturing Survey, Expectations Index	0.24	0.05
Terms of Trade, Index **	-0.06	0.88
Physical Production, Durables Consumer Goods, Index**	0.03	-0.21
Consumers Survey, Expectations Index	-0.23	0.48
Exports Volume, Index **	-0.03	0.25

Source: The Conference Board  
 \* Inverted series; a negative change in this component makes a positive contribution  
 \*\* Statistical Imputation  
 LEI change might not equal sum of its contributions due to application of trend adjustment factor

## The annual growth rate for the Brazil LEI continued to rise in January, suggesting tailwinds to further growth in the near term

\*CODACE has determined that the recession beginning in January 2020 ended in the second quarter of 2020. We will update our business cycle chronology when the monthly trough date is available.

### About The Conference Board *Leading Economic Index*® (LEI) and *Coincident Economic Index*® (CEI) for Brazil

The composite economic indexes are key elements in an analytic system designed to signal peaks and troughs in the business cycle. Comprised of multiple independent indicators, the indexes are constructed to summarize and reveal common turning points in the economy in a clearer and more convincing manner than any individual component.

The CEI reflects current economic conditions and is highly correlated with real GDP. The LEI is a predictive tool that anticipates—or “leads”—turning points in the business cycle by around six months.

The eight components of the *Leading Economic Index*® for Brazil are:

- Swap Rate - 1 year
- Ibovespa, Bovespa Index
- Manufacturing Survey, Expectations Index
- Services Sector Survey, Expectations Index
- Consumers Survey, Expectations Index
- Terms of Trade, Index
- Physical Production, Durables Consumer Goods, Index
- Exports, Quantum, Index

The six components of the *Coincident Economic Index*® for Brazil are:

- Industrial production
- Industrial Electric Energy Consumption
- Shipments of Corrugated Paper
- Volume of Sales of the Retail Market
- Occupied Employment Population
- Average Real Income of Workers
