

News Release

Jonathan Liu (732) 991-1754 / jonathan.liu@tcb.org

For Release 9:00 AM ET, February 23, 2026

Using the Composite Indexes: *The Leading Economic Index (LEI) provides an early indication of significant turning points in the business cycle and where the economy is heading in the near term. The Coincident Economic Index (CEI) provides an indication of the current state of the economy. Additional details are below.*

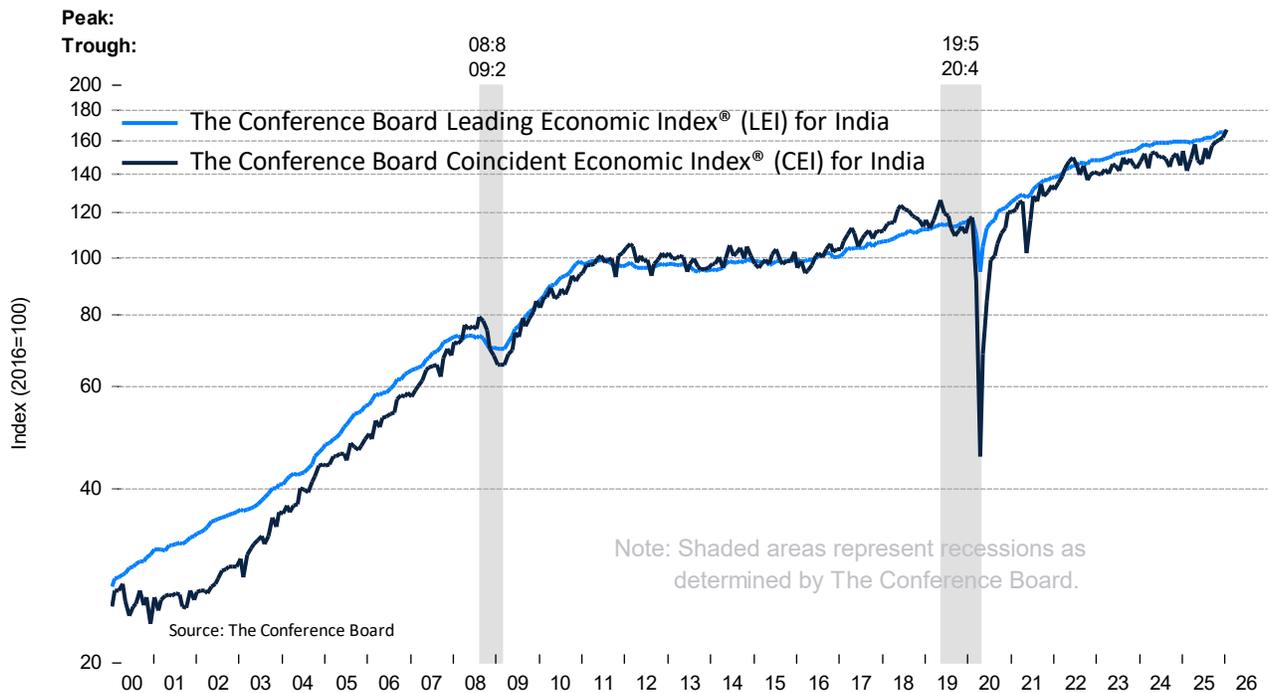

The Conference Board Leading Economic Index® (LEI) for India Ticked Up in January

The Conference Board Leading Economic Index® (LEI) for India ticked up by 0.1% in January 2026 to 164.7 (2016=100), after remaining unchanged in December. The LEI increased by 2.2% between July 2025 and January 2026, a faster rate compared to the 1.6% growth observed over the previous six-month period between January and July 2025.

The Conference Board Coincident Economic Index® (CEI) for India increased by 3.2% in January 2026 to 166.2 (2016=100), after growing by 0.9% in December. As a result, the CEI expanded by 7.4% between July 2025 and January 2026. This follows an increase of 1.0% over the previous six-month period between January and July 2025.

The next release is scheduled for Monday, March 23, 2026, at 9 A.M. ET.

The India LEI ticked up in January

A widening interest rate spread, expanded bank credit to the commercial sector, and an increase in service industry activity fueled the LEI's increase in January

The Conference Board Leading Economic Index® and Component Contributions (Percent)

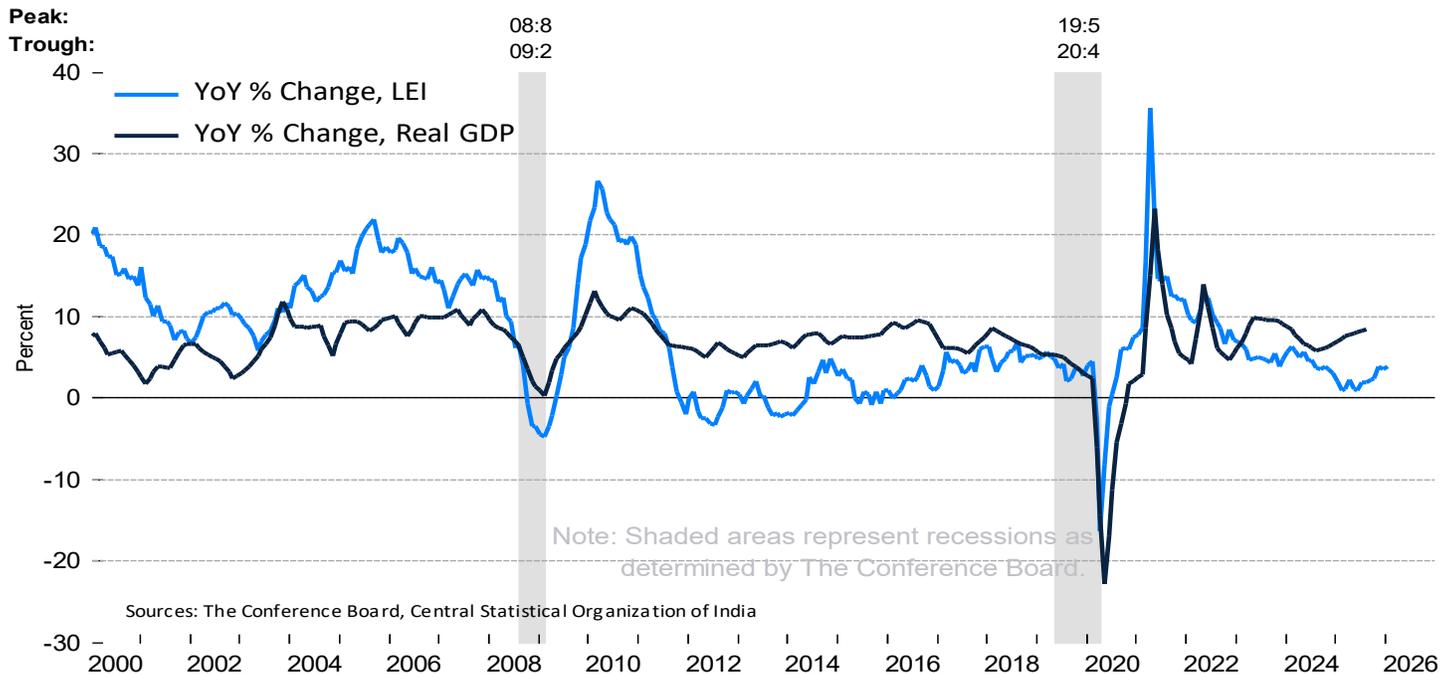

Source: The Conference Board

** Statistical Imputation.

LEI change might not equal sum of its contributions due to application of trend adjustment factor

The LEI annual growth rate improved slightly in January, suggesting a slight easing of economic headwinds

About The Conference Board *Leading Economic Index*[®] (LEI) and *Coincident Economic Index*[®] (CEI) for India

The composite economic indexes are key elements in an analytic system designed to signal peaks and troughs in the business cycle. Comprised of multiple independent indicators, the indexes are constructed to summarize and reveal common turning points in the economy in a clearer and more convincing manner than any individual component.

The CEI reflects current economic conditions and is highly correlated with real GDP. The LEI is a predictive tool that anticipates—or “leads”—turning points in the business cycle by around eight months.

The eight components of the *Leading Economic Index*[®] for India are:

- Interest Rate Spread
- BSE: Index: Monthly Average: SENSEX
- REER: 40 Currencies
- M3: Bank Credit to Commercial Sector
- Merchandise Exports (deflated by Wholesale Price Index)
- Cargo Handled
- Industrial Production: Capital Goods
- India PMI: Services Business Activity

The three components of the *Coincident Economic Index*[®] for India are:

- Industrial Production
- Total Imports (deflated by Wholesale Price Index)
- Vehicle Sales, Passenger Vehicles
