

THE CONFERENCE BOARD

FOR RELEASE: 10:00 A.M. ET, Friday, March 17, 2017

The Conference Board®
U.S. Business Cycle IndicatorsSM
THE CONFERENCE BOARD LEADING ECONOMIC INDEX®
(LEI) FOR THE UNITED STATES
AND RELATED COMPOSITE ECONOMIC INDEXES FOR FEBRUARY 2017

The Conference Board Leading Economic Index® (LEI) for the U.S. increased 0.6 percent, **The Conference Board Coincident Economic Index®** (CEI) increased 0.3 percent and **The Conference Board Lagging Economic Index®** (LAG) increased 0.2 percent in February.

- The Conference Board LEI for the U.S. increased sharply again in February, with positive contributions from all of its underlying components except for building permits. In the six-month period ending February 2017, the leading economic index increased 2.3 percent (about a 4.6 percent annual rate), much faster than the growth of 0.8 percent (about a 1.6 percent annual rate) during the previous six months. In addition, the strengths among all ten leading indicators have become very widespread.
- The Conference Board CEI for the U.S., a measure of current economic activity, also increased. The coincident economic index rose by 1.1 percent (about a 2.3 percent annual rate) between August 2016 and February 2017, faster than its growth of 0.8 percent (about a 1.6 percent annual rate) over the previous six months. Also, the strengths among the coincident indicators have remained very widespread, with all components advancing over the past six months. The lagging economic index continued to increase, but at a slower rate than the CEI. As a result, the coincident-to-lagging ratio improved marginally. Real GDP expanded at a 1.9 percent annual rate in the last quarter of 2016, after increasing 3.5 percent (annual rate) in the third quarter.
- The Conference Board LEI for the U.S. continued to increase through February and for the first time in over a decade it is above its previous peak (March 2006, 125.9). As a result, its six-month growth rate increased and is growing much faster compared to six months ago. Meanwhile, The Conference Board CEI for the U.S. has also been rising steadily. Taken together, the current behavior of the composite indexes and their components suggest that the expansion in economic activity will continue in the second half of 2017, and may even moderately pick up.

LEADING INDICATORS. Nine of the ten indicators that make up The Conference Board LEI for the U.S. increased in February. The positive contributors – beginning with the largest positive contributor – were the ISM® new orders index, the interest rate spread, average weekly initial claims for unemployment insurance (inverted), stock prices, average consumer expectations for business conditions, average weekly manufacturing hours, the Leading Credit Index™ (inverted), manufacturers' new orders for consumer goods and materials*, and manufacturers' new orders for nondefense capital goods excluding aircraft*. The negative contributor was building permits.

The LEI for the U.S. increased 0.6 percent and now stands at 126.2 (2010=100). Based on revised data, this index increased 0.6 percent in January and increased 0.6 percent in December. Over the six-month span through February, the leading economic index increased 2.3 percent, with all ten components advancing (diffusion index, six-month span equals 100 percent).

The next release is scheduled for April 20, 2017, Thursday at 10 A.M. ET

COINCIDENT INDICATORS. All four indicators that make up The Conference Board CEI for the U.S. increased in February. The positive contributors to the index – beginning with the largest positive contributor – were industrial production, employees on nonagricultural payrolls, personal income less transfer payments*, and manufacturing and trade sales*.

The CEI increased 0.3 percent and now stands at 114.9 (2010=100). Based on revised data, this index increased 0.1 percent in January and increased 0.4 percent in December. During the six-month period through February, the coincident economic index increased 1.1 percent, with all four components advancing (diffusion index, six-month span equals 100 percent).

LAGGING INDICATORS. The Conference Board Lagging Economic Index for the U.S. increased 0.2 percent and stands at 123.5 (2010=100) in February, with only one of its seven components advancing. The positive contributor to the index was the ratio of consumer installment credit outstanding to personal income*. The negative contributors – beginning with the largest negative contributor – were commercial and industrial loans outstanding*, the change in the index of labor cost per unit of output, manufacturing* and the ratio of manufacturing and trade inventories to sales*. The average duration of unemployment (inverted), the average prime rate charged by banks and the change in CPI for services held steady in February. Based on revised data, the lagging economic index increased 0.2 percent in January and increased 0.3 percent in December.

DATA AVAILABILITY AND NOTES.

The data series used to compute **The Conference Board Leading Economic Index**[®] (LEI) for the U.S., **The Conference Board Coincident Economic Index**[®] (CEI) for the U.S. and **The Conference Board Lagging Economic Index**[®] (LAG) for the U.S. and reported in the tables in this release are those available “as of” 8:30 am ET on March 16, 2017. Some series are estimated as noted below.

* Series in The Conference Board LEI for the U.S. based on our estimates are manufacturers’ new orders for consumer goods and materials and manufacturers’ new orders for nondefense capital goods excl. aircraft. Series in The Conference Board CEI for the U.S. that are based on our estimates are industrial production, personal income less transfer payments and manufacturing and trade sales. Series in The Conference Board LAG for the U.S. that are based on our estimates are manufacturing and trade inventories to sales ratio, the change in labor cost per unit of output, manufacturing, consumer installment credit to income ratio, and the personal consumption expenditure deflator used to deflate commercial and industrial loans outstanding.

The procedure used to estimate the current month’s personal consumption expenditure deflator (used in the calculation of commercial and industrial loans outstanding) now incorporates the current month’s consumer price index when it is available before the release of The Conference Board LEI for the U.S.

THE CYCLICAL INDICATOR APPROACH. The composite economic indexes are the key elements in an analytic system designed to signal peaks and troughs in the business cycle. The leading, coincident, and lagging economic indexes are essentially composite averages of several individual leading, coincident, or lagging indicators. (See page 3 for details.) They are constructed to summarize and reveal common turning point patterns in economic data in a clearer and more convincing manner than any individual component—primarily because they smooth out some of the volatility of individual components.

Historically, the cyclical turning points in The Conference Board LEI for the U.S. have occurred before those in aggregate economic activity, while the cyclical turning points in The Conference Board CEI for the U.S. have occurred at about the same time as those in aggregate economic activity. The cyclical turning points in The Conference Board LAG for the U.S. generally have occurred after those in aggregate economic activity.

U.S. Composite Economic Indexes: Components and Standardization Factors

<u>Leading Economic Index</u>	<u>Factor</u>
1 Average weekly hours, manufacturing	0.2774
2 Average weekly initial claims for unemployment insurance	0.0330
3 Manufacturers' new orders, consumer goods and materials	0.0821
4 ISM [®] new orders index	0.1587
5 Manufacturers' new orders, nondefense capital goods excl. aircraft	0.0405
6 Building permits, new private housing units	0.0298
7 Stock prices, 500 common stocks	0.0397
8 <i>Leading Credit Index</i> [™]	0.0818
9 Interest rate spread, 10-year Treasury bonds less federal funds	0.1123
10 Avg. consumer expectations for business conditions	0.1447
<u>Coincident Economic Index</u>	
1 Employees on nonagricultural payrolls	0.5295
2 Personal income less transfer payments	0.2050
3 Industrial production	0.1461
4 Manufacturing and trade sales	0.1194
<u>Lagging Economic Index</u>	
1 Inventories to sales ratio, manufacturing and trade	0.1256
2 Average duration of unemployment	0.0371
3 Consumer installment credit outstanding to personal income ratio	0.1847
4 Commercial and industrial loans	0.0961
5 Average prime rate	0.2993
6 Labor cost per unit of output, manufacturing	0.0501
7 Consumer price index for services	0.2071

Notes:

The component factors are inversely related to the standard deviation of the month-to-month changes in each component. They are used to equalize the volatility of the contribution from each component and are “normalized” to sum to 1. When one or more components are missing, the other factors are adjusted proportionately to ensure that the total continues to sum to 1.

These factors were revised effective with the release in January 2017, and all historical values for the three composite economic indexes were revised at this time to reflect the changes. (Under normal circumstances, updates to the leading, coincident, and lagging economic indexes only incorporate revisions to data over the past six months.) The factors for The Conference Board LEI for the U.S. were calculated using May 1990-December 2015 as the sample period for measuring volatility. A separate set of factors for the February 1959 - December 1977, January 1978 - December 1983 and January 1984 – April 1990 periods are available upon request. The primary sample period for the coincident and lagging economic indexes was February 1959 – December 2015. For additional information on the standardization factors and the index methodology see: “Benchmark Revisions in the Composite Indexes,” *Business Cycle Indicators* December 1997 and “Technical Appendix: Calculating the Composite Indexes” *Business Cycle Indicators* December 1996, or the Web site: <http://www.conference-board.org/data/bci.cfm>

The trend adjustment factor for The Conference Board LEI for the U.S. is -0.0806 (over the 1984 – present) and 0.0891 (over the 1959-1983 period), and the trend adjustment factor for The Conference Board LAG for the U.S. is 0.1458.

To address the problem of lags in available data, those leading, coincident and lagging indicators that are not available at the time of publication are estimated using statistical imputation. An autoregressive model is used to estimate each unavailable component. The resulting indexes are therefore constructed using real and estimated data, and will be revised as the unavailable data during the time of publication become available. Such revisions are part of the monthly data revisions, now a regular part of the U.S. Business Cycle Indicators program. The main advantage of this procedure is to utilize in the leading economic index data such as stock prices, interest rate spread, and manufacturing hours that are available sooner than other data on real aspects of the economy such as manufacturers’ new orders. Empirical research by The Conference Board suggests that there are real gains in adopting this procedure to make all the indicator series as up-to-date as possible.

NOTICES

The Conference Board Leading Economic Index® (LEI) for the U.S. news release schedule for 2017:

Thursday, April 20, 2017	For March 2017 data
Thursday, May 18, 2017	For April 2017 data
Thursday, June 22, 2017	For May 2017 data
Thursday, July 20, 2017	For June 2017 data
Thursday, August 17, 2017	For July 2017 data
Thursday, September 21, 2017	For August 2017 data
Thursday, October 19, 2017	For September 2017 data
Monday, November 20, 2017	For October 2017 data
Thursday, December 21, 2017	For November 2017 data

All releases are at 10:00 AM ET.

About The Conference Board

The Conference Board is a global, independent business membership and research association working in the public interest. Our mission is unique: To provide the world's leading organizations with the practical knowledge they need to improve their performance *and* better serve society. The Conference Board is a non-advocacy, not-for-profit entity holding 501 (c) (3) tax-exempt status in the United States.

	Feb to	Mar to	Apr to	May to	Jun to	Jul to	Aug to
	Aug	Sep	Oct	Nov	Dec	Jan	Feb
Leading index							
Percent change	0.8	1.1	0.7	1.1	1.5	1.6	2.3
Diffusion index	45	60	60	70	90	90	100
Coincident index							
Percent change	0.8	1.1	1.0	1.1	1.1	1.0	1.1
Diffusion index	87.5	100	100	100	100	87.5	100
Lagging index							
Percent change	1.6	1.2	1.1	0.8	1.3	1.3	1.1
Diffusion index	78.6	64.3	64.3	50	78.6	71.4	57.1

p Preliminary. r Revised (noted only for index levels and one-month percent changes). c Corrected.

CALCULATION NOTE: The diffusion indexes measure the proportion of the components that are contributing positively. Components that rise more than 0.05 percent are given a value of 1.0, components that change less than 0.05 percent are given a value of 0.5, and components that fall more than 0.05 percent are given a value of 0.0.

The full history of composite and diffusion indexes is available by subscription on our web site at <https://www.conference-board.org/data/bcicountry.cfm?cid=1>

** Statistical Imputation (See page 3 for more details)

© The Conference Board 2017. All data contained in this table are protected by United States and international copyright laws. The data displayed are provided for informational purposes only and may only be accessed, reviewed, and/or used in accordance with, and the permission of, The Conference Board consistent with a subscriber or license agreement and the Terms of Use displayed on our website at www.conference-board.org. The data and analysis contained herein may not be used, redistributed, published, or posted by any means without express written permission from The Conference Board.

COPYRIGHT TERMS OF USE. All material in this data table, this press release, and on Our Sites are protected by United States and international copyright laws. You must abide by all copyright notices and restrictions contained in Our Sites. You may not reproduce, distribute (in any form including over any local area or other network or service), display, perform, create derivative works of, sell, license, extract for use in a database, or otherwise use any materials (including computer programs and other code) in this data table, this press release, and on Our Sites (collectively, "Site Material"), except that you may download Site Material in the form of one machine readable copy that you will use only for personal, noncommercial purposes, and only if you do not alter Site Material or remove any trademark, copyright or other notice displayed on the Site Material. If you are a subscriber to any of the services offered on Our Sites, you may be permitted to use Site Material, according to the terms of your subscription agreement.

TRADEMARKS. "THE CONFERENCE BOARD", the TORCH LOGO, "THE CONFERENCE BOARD LEADING ECONOMIC INDEX", "THE CONFERENCE BOARD COINCIDENT ECONOMIC INDEX", "THE CONFERENCE BOARD LAGGING ECONOMIC INDEX", and any other logos, indicia and trademarks featured in this data table, this press release, or on Our Sites are trademarks owned by The Conference Board, Inc. in the United States and other countries ("Our Trademarks"). You may not use Our Trademarks in connection with any product or service that does not belong to us or in any manner that is likely to cause confusion among users about whether The Conference Board is the source, sponsor, or endorser of the product or service, nor in any manner that disparages or discredits us.

Violators of these rights will be prosecuted to the full extent of the law. Nothing herein shall restrict the use of the information by news journalists using the information in a legitimate news publication or periodical.

U.S. Composite Economic Indexes (2010=100)

Shaded areas represent recessions as determined by the National Bureau of Economic Research.
