

Modernizing health programs for fiscal sustainability and quality

Without reform, Medicare's Hospital Insurance Trust Fund will be depleted in 2036, resulting in an 11% cut in benefits.

A rapidly aging population with greater utilization of health care threatens the financial sustainability of Medicare and other Federal health programs.

SOLUTIONS

- **Adopt** a comprehensive reform package rather than piecemeal initiatives.
- **Implement** value-based care and alternative payment models.
- **Invest** now in workforce and data infrastructure.
- **Emphasize** primary care and care coordination to drive better health outcomes.
- **Streamline** regulations and payment policies.
